

This image illustrates a case of an invasive, moderately differentiated, keratinizing squamous cell carcinoma. Saibishkumar and colleagues discuss this case along with 2 others in their quest to determine whether neonatal circumcision has a protective effect against the development of squamous cell carcinoma of the penis in later life. See page 39 for their review.

Cette image montre un carcinome spinocellulaire envahissant, moyennement différencié et kératinisant. Saibishkumar et ses collaborateurs discutent de ce cas et de deux autres en cherchant à savoir si la circoncision néonatale a un effet protecteur contre le développement du carcinome spinocellulaire du pénis plus tard au cours de la vie. Voir l'analyse en page 39.

Publications Mail Agreement no. 41387051. Return undeliverable Canadian copies to *CUAJ*, 1155 University, Suite 1155, Montréal QC H3B 3A7; journal@cua.org.

Numéro de convention poste-publications 41387051. Retourner toutes copies canadiennes non livrées au *JAUC*, 1155 rue Université, Bureau 1155, Montréal, QC H3B 3A7; journal@cua.org.
