

Hernias are a rare complication following muscle splitting dorsal lumbotomy surgery. Dr. Faddegon and colleagues present a case of transperitoneal laparoscopic repair of a lumbotomy incisional hernia. This case illustrates the benefits of laparoscopic repair of a rare lumbotomy complication. See page 139 for details.

Les hernies sont une rare complication à la suite d'une lombotomie dorsale par dissociation musculaire. Le docteur Faddegon et ses collègues présentent un cas de traitement chirurgical d'une hernie par laparoscopie transpéritonéale. Ce cas illustre les avantages d'un traitement chirurgical par laparoscopie d'une rare complication suite à une lombotomie. Pour les détails, veuillez vous référer à la page 139.
