Robotic renal surgery remains controversial. Dr. Warren and colleagues review 51 clinical trials encompassing robot-assisted pyeloplasty, nephrectomy, nephroureterectomy, living donor nephrectomy and partial nephrectomy. In this review, they discuss the feasibility of this new technology. See **page 231** for more.

Le rôle de la robotique en chirurgie rénale demeure controversé. Le docteur Warren et ses collaborateurs passent en revue 51 études cliniques, incluant des cas tous assistés par robot, de pyéloplastie, de néphrectomie, de néphrourétérectomie, de néphrectomie chez des donneurs vivants et de néphrectomie partielle. Dans cet article, ils examinent la faisabilité de cette nouvelle technologie. Pour plus de détails, veuillez vous reporter à la **page 231**.
